SUMMARY

Passionate Computer Engineering student, specializing in software development, web technologies, and innovative problem-solving. Certified Web Design Technician with hands-on experience developing dynamic websites and digital solutions for local businesses. I thrive in collaborative environments, aiming to deliver engaging digital experiences that drive business results while considering an eye for detail, creativity and a flair for design and user experience. I possess strong command of the English language, and I am always self-motivated to learn new abilities quickly.

WORK EXPERIENCE

Avalantec

Nov. 2023 – Feb. 2024

Frontend Developer

Heredia, CR

- Developed frontend components for a medical web application, including an interactive scheduling calendar and dynamic patient information modules.
 - Enhanced website performance and loading speed through optimized, reusable code structures.
 - Improved initial design, ensuring pixel-perfect implementation and seamless user experience.
- Collaborated directly with the design and backend teams, translating design concepts into functional, interactive interfaces using HTML, CSS Frameworks (Bootstrap), and JavaScript frameworks (Angular).
- Successfully contributed to the company's commercial projects, receiving positive client feedback for quality and innovation.

EDUCATION

Universidad Latinoamericana de Ciencia y Tecnología (ULACIT)

Jan. 2023 - Present

Bachelor's degree in computer engineering.

San José, CR

- Completed community service (TCU) providing tutoring in core academic subjects to children from low-income communities, fostering educational improvement and social impact.
- Earned Cisco Networking Basics Badge, demonstrating foundational skills in network infrastructure, protocols, and troubleshooting.

Fundación Tecnológica de Costa Rica (FUNDATEC)

May. 2021 - Oct. 2022

Technical degree in graphic and web design

San José, CR

- Developed multiple graphic design projects and functional website prototypes, showcasing strong creative abilities and technical expertise.
- Collaborated effectively within diverse teams, utilizing professional design tools to generate visual assets and enhance user experience.
- Relevant coursework: Digital Retouching (Photoshop), Vector Design (Illustrator), Motion Graphics (After Effects), Web Design (UX/UI, HTML5, CSS3 & JavaScript), Visual Identity, and Design Project Management.
